SKILLS

Backend & APIs
PHP | Yii2 | Laravel | CodeIgniter | Node.js | REST APIs

Frontend
React.js | TypeScript | JavaScript | HTML/CSS

Databases & Caching
MySQL | PostgreSQL | SQLite | Redis

Integration & Identity
SnapLogic iPaaS | Okta | SCIM 2.0 | Nuxeo | MCP

Platforms & Architecture
Backstage | Microservices | Enterprise Integration | Software Architecture | API Design

AI & Developer Productivity
GitHub Copilot | Git | Generative AI | AI-assisted Development

Tools & Leadership
Docker | Git | Team Leadership | Stakeholder Management | Cross-functional Collaboration

PROFILE

Senior Software Engineer with 10+ years of experience building backend systems, REST APIs, enterprise applications, integrations, and full-stack solutions. Strong PHP background across Yii2, Laravel, and CodeIgniter, with hands-on experience in Node.js, TypeScript, React.js, MySQL, PostgreSQL, Docker, SnapLogic, and Backstage.

WORK EXPERIENCE

Senior Software Engineer

Omnicom Global Solutions, Bengaluru | June 2024 – Present

- Owned the end-to-end development of Freelancer Timesheet Utility 3.0, from feature planning and technical design through implementation, testing, and delivery. Built core capabilities including timesheet submission and approval workflows, payroll calculation, overtime rules, event-driven audit logging, and reporting using myDBR.
- Led the development of Invoices 2.0 features end-to-end, including invoice OCR, document transmission to Nuxeo, Vendor Charge Detail backup generation, and automated transmission of backup documents to Nuxeo, from requirements and planning through implementation and testing.
- Designed and developed custom backend plugins for Omnicom OneIDP (Backstage), including Okta entity synchronization for users and groups, Domain Entity Provider, and System Entity Provider. Implemented automated creation of domains and systems based on synchronized users and groups, extending the platform's identity and catalog capabilities.
- Designed and developed SnapLogic APIs consumed by Apple to provide access to Vendor Charge Details and the corresponding backup documents, enabling external consumers to retrieve charge-level data and supporting documentation through enterprise API integrations.
- Contributed to MCP development for the Omnicom OneIDP platform, extending platform capabilities for AI-assisted developer and system interactions.
- Leveraged GitHub Copilot and OpenAI Codex throughout the software development lifecycle, using AI to analyze requirements, support feature planning, review implementations, troubleshoot issues, generate and refine test scenarios, and improve development productivity across enterprise applications and integrations.

Software Engineer

Xiaomi India, Bengaluru | September 2021 – June 2024

- Designed and optimized REST APIs consumed by the Mi-Retail mobile application, reducing server response time by 40% through backend and API performance improvements.
- Improved Mi-Retail backend and API performance, contributing to a 20% increase in application downloads.
- Developed backend services for the Distributor Management System (DMS), supporting partner management and core business operations.
- Automated Warehouse Management System (WMS) processes, reducing manual operational workload by 20%.
- Designed and implemented REST APIs for CRM purchase-order workflows used by LFR partners including Reliance and Croma, contributing to 20% B2B business growth and a 15% reduction in manual workload.
- Redesigned and optimized the IMEI and Serial Number validation process used across Xiaomi's B2B business applications, improving consistency and reusability of a shared validation capability.
- Led the development and execution of the "Diwali with Mi" campaign, a nationwide lucky-draw initiative for Xiaomi/Redmi device purchases across retail stores in India, supporting prize distribution worth approximately ₹15 crore across states during the 2022 and 2023 campaigns.
- Led and coordinated a team of 8 engineers while remaining hands-on with development, troubleshooting, system design, performance optimization, and delivery.

Team Lead

Gozo Technologies / Gozo Cabs, Kolkata | November 2018 – September 2021

- Led a team of 5 developers delivering backend and frontend components across the GozoCabs web platform, coordinating development, troubleshooting, and delivery across multiple application areas.
- Designed and developed REST APIs for the Consumer App, Driver App, and Partner App, supporting core booking workflows and integrations.
- Led backend development using PHP, Yii, and MySQL, while contributing to frontend development using HTML, CSS, and JavaScript.
- Integrated B2B travel partners including MakeMyTrip (MMT), Goibibo, and Yatra into the GozoCabs booking platform, enabling partner-driven bookings and increasing daily bookings from approximately 1,200 to 2,200+ — an increase of over 80%.
- Coordinated technical execution, requirements, troubleshooting, stakeholder communication, and delivery across multiple applications and partner integrations.
- Contributed to a 25% reduction in project costs and a 50% improvement in client satisfaction through effective technical execution and team coordination.

Software Developer

Epitech Internet Pvt. Ltd., Kolkata | September 2017 – November 2018

- Developed SaaS billing and stock management applications for INDANE and HP LPG dealers across Kolkata using C# and SQLite, supporting day-to-day dealer operations.
- Designed and implemented REST API integrations for an LPG inspection mobile application, enabling backend connectivity between the mobile application and business systems.
- Managed onsite application installation, deployment, maintenance, troubleshooting, and production support across customer locations, ensuring reliable adoption and operation of the applications.
- Supported the onboarding of 12 major LPG dealers during the pilot launch and 13 additional dealers across Kolkata, contributing to solutions that generated approximately ₹1 crore in annual revenue.

EDUCATION

B.Tech in Computer Science

Narula Institute of Technology, Kolkata | 2010 - 2014

AWARDS

- **The OG-Star of the Quarter**
Technology Solutions OGS, Omnicom Global Solutions | 2026
- **Annalectual of the Quarter**
Technology Solutions OGS, Omnicom Global Solutions | 2025
- **Fire Fighter Award**
Xiaomi India | 2023
- **Certificate of Appreciation**
Gozo Technologies | 2019

CERTIFICATIONS

- Building PHP Applications with Generative AI
- Demystifying Agentic AI with ChatGPT
- Build Your Own GPTs
- Managing Cross-Functional Collaboration as a Leader
